**Corent**

**Agility Multichannel**

## Corent delivered one of the world's leading PIM solution as a fully instrumented SaaS in different tenancy models on Microsoft Azure

Agility Multichannel is a global software business with headquarters in the UK and with an established installed base of blue-chip clients.

The Agility® solution offers Product Information Management (PIM) capability, aimed at leading B2B retail and FMCG businesses.
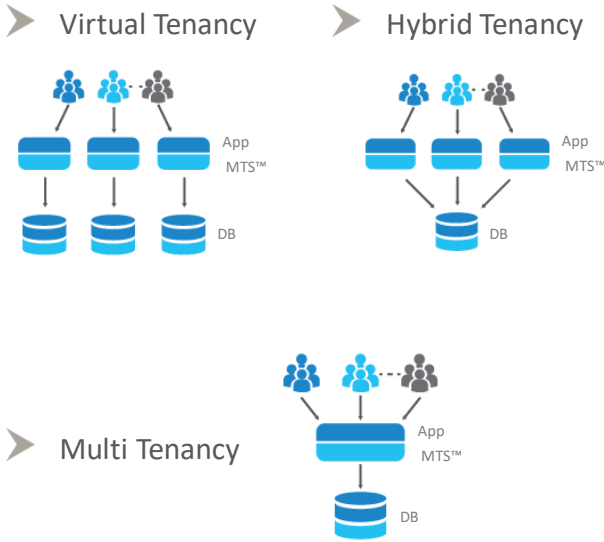

### BUSINESS CHALLENGES

➤ Increased customer requests for a SaaS offering.

➤ Need for a fast and affordable route to SaaS.

➤ Without rewriting existing product code.

➤ Global SaaS deployment and management capabilities.

➤ Integration of ancillary applications.

➤ Cost-effective tenancy models for different markets.

### PRODUCT USED

SaaSOps on Microsoft Azure.

SaaSOps transforms your software to a SaaS solution by adding tenancy, business, and operations services. Now your application can be delivered as a Service on Microsoft Azure. You can choose from Virtual, Hybrid to Multi-tenancy and define your own Commercial and Operations Services to fit your business needs.

**Tenancy Management** — Multi-Tenancy Transformation

**App Management** — Single or Multiple Apps

**Service Operations** — Monitoring, BI and Control, Franchise Management

**Security and Scalability** — Tenant Isolation and Workload Management

**Cloud Services** — Multi-Cloud Deployment and Management

**Monetization** — Subscription Management

**SaaSOps**

## BUSINESS BENEFITS

Standardizing legacy hosting platform.

Reaching new markets (through SaaS).

Protecting installed base.

Avoid large CAPEX investment.

Accelerating time to market and value.

## RESULT

With the SaaSOps advanced SaaSification and SaaS management technologies, Agility Multichannel can now offer its customers a SaaS solution, based on existing IP/ application code (no rewrite). This with different deployment options meeting current customer demand and future "volume" market demand with a cost-effective Multi-Tenancy model.

### SaaS Deployment Model in 3 Steps – Achievable Within Weeks:

| SaaSification | Business Setup | Onboard Customers |
|---|---|---|
| Install Application on Azure | Add your Own Banners, T&C's and Onboarding Process | Setup Customer Account |
| We Assess your Application | Setup your Subscription Model | Customer Subscribes to Product |
| You Choose your SaaS Model: VT/HT/MT | Setup your Metering for Billing Information | Customer Receives Access Credentials (via) Email |
| We SaaSify your Application | Setup your Azure Provisioning Models and Scaling | Customer starts using Application on Azure |
