One-Click Shift

A Click away from migrating
your Application to the Cloud.

Moving your application to your preferred Cloud is just One Click away.

Migrate your application to the Cloud in just one click and see how SurPaaS® Shift seamlessly migrates your application to Cloud in a short time with no data loss during migration.

Cloud Deployment

One Click Shift

Application Servers

Business Challenges:

» Shifting applications manually involves more re-engineering work.

» Difficult to achieve a best suitable migration plan.

» Unable to predict the performance of the application when adding or re-architecting the workloads.

» Involves more complicate steps to migrate an application.

» Tedious and time consuming process.

Solutions:

✓ SurPaaS® Shift's automated analysis provides a workload migration plan that eases migration without manual effort.

✓ Completely automated migration improves your re-engineering capabilities that will enhance the application performance in any preferred Cloud.

✓ Flexibility to pause the migration, make modifications to the migration plan and proceed with migration.

✓ Simple steps that will migrate any application to multiple Clouds with just one click.
