

# Workload Store

Get access to lots of useful ready-made Scripting solutions.

## Our Workload store has solutions to your every Scripting need.

Select from a library of Shift script templates for easy Cloud migration of your applications and its workloads or use custom scripts to enable controlled Cloud migration.

### Business Challenges:

- » Inability to store and backup the script files in a secured location without redundancy and reuse when required.
- » Need to develop new script files for migration to newer version of workloads or switching to different operating system.
- » Developing new script files involves more time and resources.
- » Tedious to search for appropriate script files based on different requirements.

### Solutions:

- ✓ A repository with variety of workload scripts to choose from and use during Cloud migration, stored in a secured location.
- ✓ Helps you to save time and resources by providing you with readily available scripts for any operating system, workload, etc.
- ✓ Dynamic parameterized script files allow you to pass values to inbuilt parameters for usage during execution.
- ✓ Provides you a debugging mechanism with log files to troubleshoot scripting issues.
